Parts & Materials

A. Self Tapping Screws: 48

B. 3/4" Magnets: 20

C. Vertical Supports: 4

D. Horizontal Brackets: 6

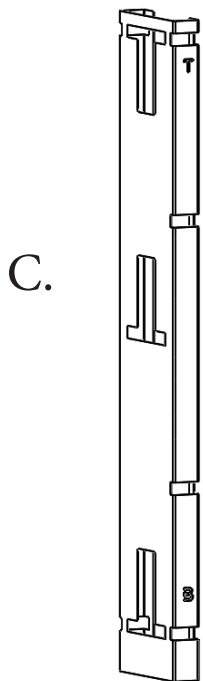

E. Shadow Boxes: Varies by style *May not be applicable*

F. Facing Material: Varies by style

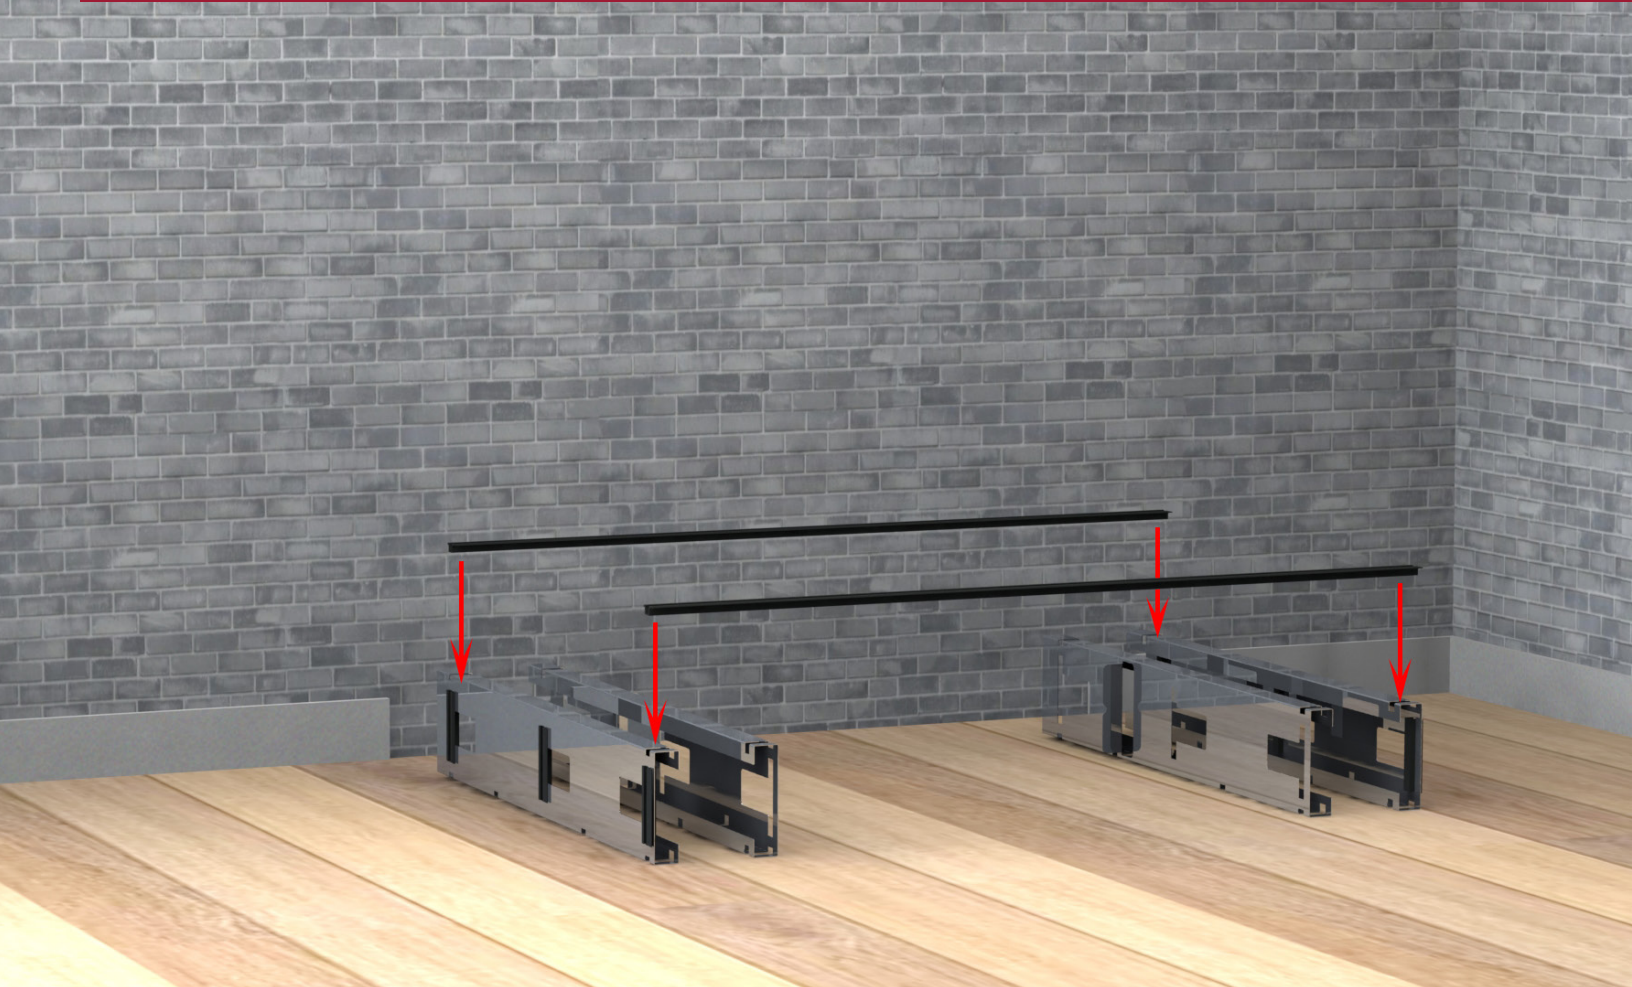

G. Top Cap/Shelf: Varies by style

**There may be additional trims and accent pieces, depending on the options chosen*

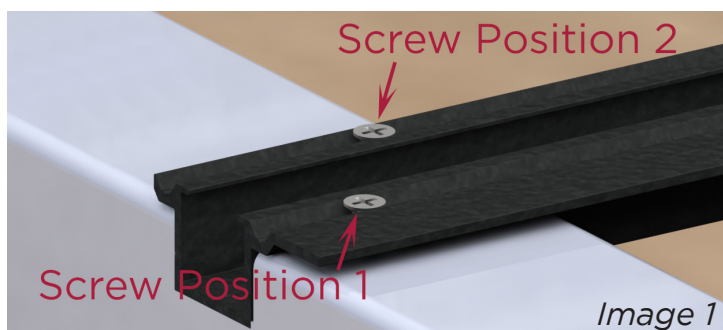

Tip: We also have a video installation guide, please see the back page!

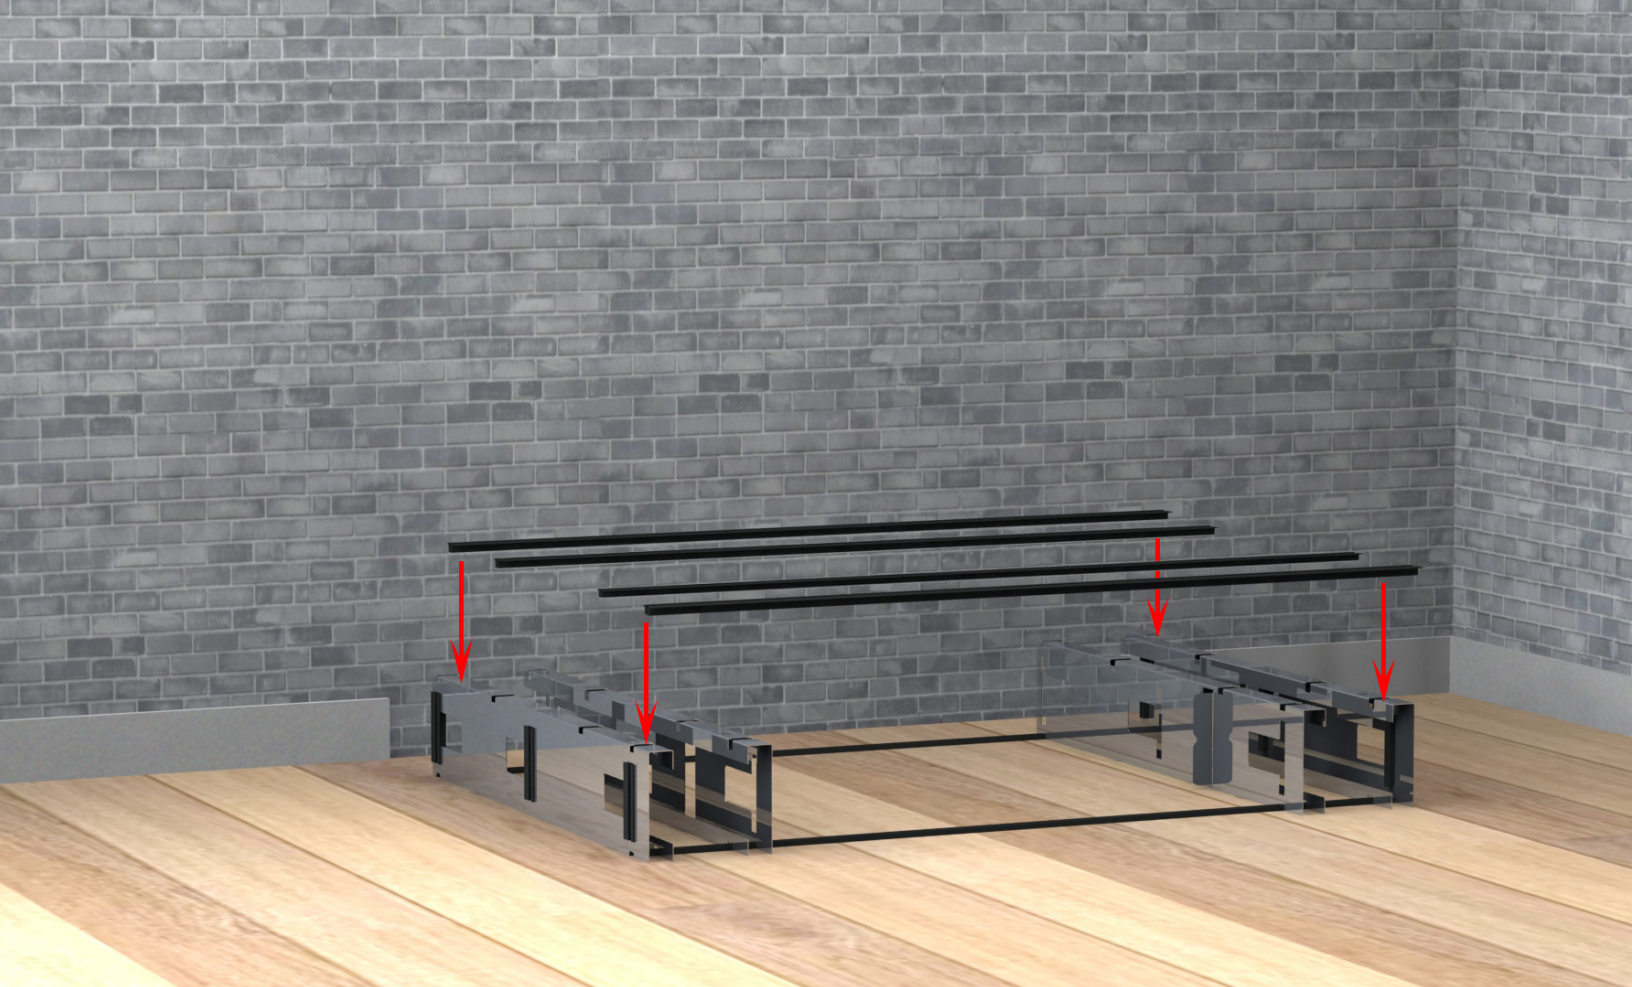

Cabinet Assembly

1. Place the 4 vertical supports (C) face down, positioned according to the provided CAD drawing. *Face of vertical supports has 4 bracket slots, rear has only 2. Each vertical support is marked with a "T" for top, and "B" for bottom.*
2. Insert 2 of the horizontal mounting brackets (D) into the slots in the vertical supports.
3. Using 8 of the provided metal screws (A), fasten the horizontal brackets to the vertical supports. Place one screw in position 1 (see image 1) where each horizontal bracket meets the vertical support.
4. Ensure that the framework is in square, and make any needed adjustments to square the unit.
6. Using 8 of the provided metal screws (A), place one screw in position 2 (see image 1) where each horizontal bracket meets the vertical support.

Cabinet Assembly

7. Flip unit over.

8. Locate the 4 remaining horizontal mounting brackets (D). Insert magnets (B) into slots on only 3 of the mounting brackets (Image2).

9. Place the horizontal brackets into the appropriate slots on the vertical supports. Place the bracket without magnets in the top slot.

10. Using 32 screws (A), fasten the horizontal brackets to the vertical supports. Use the same screw pattern as before.

Cabinet Assembly

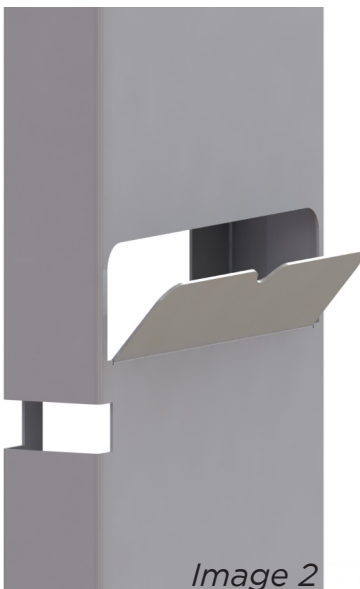

Example of magnet placement, on bottom 3 brackets only.

Cabinet Assembly

11. Stand unit upright against the wall, or in the desired location.
12. Locate studs in wall (if applicable), and use preferred screws/fasteners (not included) to fasten rear horizontal brackets to wall.
13. Bend fireplace support tabs 90° (image 2).

Shadow Box

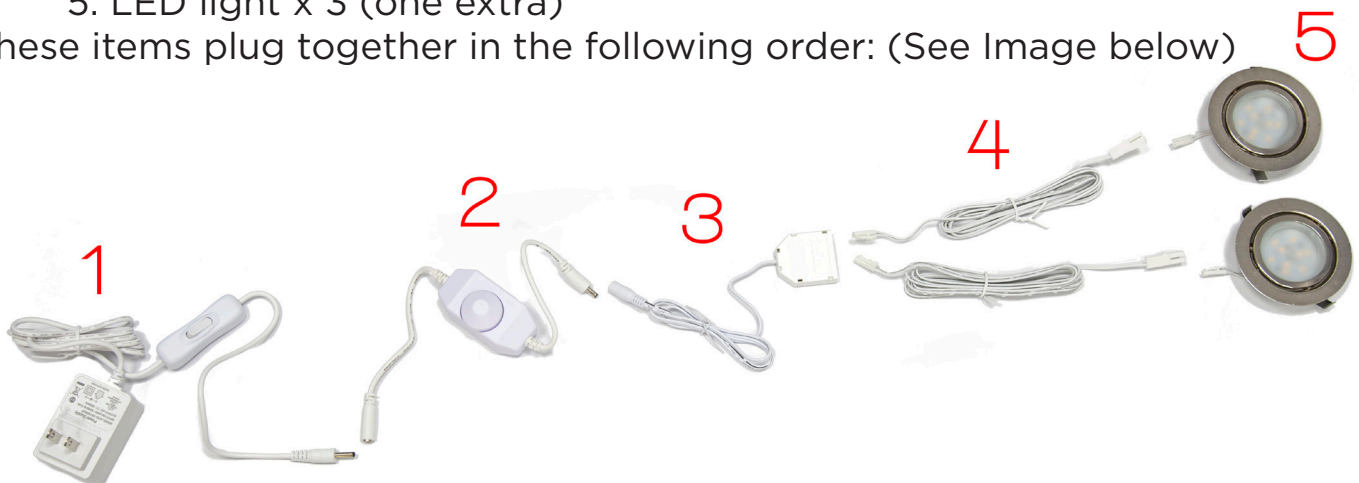

14. (If applicable) Slide shadow box (E) into appropriate location, box will magnetically snap into place against horizontal supports. Final adjustments will be made after facing material is installed.

14a. (If your shadow boxes include a light kit follow these instructions. Otherwise proceed to the next step.) Your light kit includes the following items:

1. AC adapter with on/off switch
2. Optional Dimmer switch
3. Hub
4. Extension cable x 3 (one extra)
5. LED light x 3 (one extra)

These items plug together in the following order: (See Image below)

15. See Fireplace Owners Manual for installation procedure. Some fireplaces will need to be installed before the decorative facing of the unit. If so, install your fireplace now. Otherwise, proceed to the next step.

16. Locate the facing material (F), and locate the clips on the top rear of facing. Slide the clips onto the top horizontal mounting bracket. Then allow the bottom of the facing to swing into place against the unit, magnetically snapping into place.

17. If your unit has additional side facings, install them repeating the process in the previous step. *(If applicable)*

18. *(If applicable)* Place approximately 4 magnets (B) on the back of each corner post. Place one post against each corner of the unit, magnetically snapping in place.

Top Cap/Shelf

19. *(If applicable)* Slide the top cap (G) into place on top of the unit. If your kit came with a shelf, refer to the instruction manual included with the shelf.

Fireplace Installation

18. If you did not install your fireplace unit at step 15, refer to your owners manual for installation process, and do so at this time.

Enjoy your finished product!

If you have any issues during installation, or have further questions, please contact your local dealer.
